Complete master e-commerce workflow

Architecture overview. Readable node and connection sheets follow.

Complete master e-commerce workflow

Readable detail sheet 1/4. Node numbers and page references preserve every directed connection.

#01 / Trigger / Implemented

Discover OVIA

Home, navigation and bag / luggage storefront.

src/app/page.tsx:1

Next -> #2 (p2)

#02 / Frontend Action / Implemented

Browse and choose variant

Product listing, detail, search and filter flows.

src/components/product-detail.tsx:1

Next -> #3 (p2)

#03 / Backend Service / Implemented

Wishlist and shopping bag

Frontend provider sends cart and wishlist mutations.

src/components/store-provider.tsx:1

Next -> #4 (p2)

#04 / Frontend Action / Implemented

Review checkout

Address, PIN serviceability, shipping method and quote.

src/app/checkout/page.tsx:1

Next -> #5 (p3)

Complete master e-commerce workflow

Readable detail sheet 2/4. Node numbers and page references preserve every directed connection.

#05 / IF / Switch / Implemented

Order valid and stock available?

Idempotent order and stock reservation transaction.

src/server/commerce.ts:115

Yes / accepted -> #6 (p3); No / rejected -> #13 (p5)

#06 / External API / Implemented

Verify provider payment

Razorpay secure checkout; PayPal sandbox is an alternate flow. Runtime configuration and connectivity are Unverified.

src/server/razorpay-checkout.ts:385

Next -> #7 (p3)

#07 / Backend Service / Implemented

Finalize paid order

Confirmed paid state, replay event and mail queue.

src/server/commerce.ts:211

Next -> #8 (p3)

#08 / Backend Service / Implemented

Owner fulfillment approval

Verified payment precedes courier shipment and pickup.

src/server/logistics.ts:69

Next -> #9 (p4)

Complete master e-commerce workflow

Readable detail sheet 3/4. Node numbers and page references preserve every directed connection.

#09 / External API / Implemented

Delhivery delivery tracking

Courier API / authenticated webhook updates stored shipping. Runtime configuration and connectivity are Unverified.

src/lib/shipping/service.ts:73

Next -> #10 (p4)

#10 / Frontend Action / Implemented

Delivered order and aftercare

Customer tracks delivery, submits reviews or opens cancellation / return / refund requests.

src/components/account-order-details.tsx:1

Next -> #11 (p4)

#11 / Backend Service / Implemented

Aftercare review and refund

Tickets are reviewed; gateway refunds follow the separate authorized refund flow.

src/server/care-order-requests.ts:131

Next -> #12 (p4)

#12 / Response / Implemented

Customer outcome recorded

Display delivery, review request, cancellation and provider refund evidence.

src/components/account-orders-returns.tsx:1

END: no outgoing connection

Complete master e-commerce workflow

Readable detail sheet 4/4. Node numbers and page references preserve every directed connection.

#13 / Error Handler / Implemented

Request failed

Validation, access, conflict or service errors are returned to the caller. Status and error shape depend on the specific route.

src/server/http.ts:69

Next -> #14 (p5)

#14 / Response / Implemented

Show error / retry

Failure end state. Caller receives the actual error; a retry may be offered by the UI.

src/server/http.ts:69

END: no outgoing connection

Complete master e-commerce workflow

Complete directed connection register / no omitted success, failure or proposed edges
